PRIVACY POLICY

INTRODUCTION

MASFA (Monitoring Agency for Space Flight Activities) was created in January 2026 by Kion G. and Lewis Knaggs, as a platform network to notify and inform the public about space flight activities, specifically surrounding launch operations.

Often, during activities such as the inaugural flight of new rockets, operations are delayed due to technical or weather related problems, which is normal for space flight.

But during such times, it's hard to grasp what is really happening. During launches, this website is updated to reflect the best possible information on launch activities.

We dive deep, looking at sources, and often contacting companies, organizations and facilities involved in these launch operations to get as much information to share with the public as possible.

We are committed to transparency regarding any information processed when you visit our site.

1.

GENERAL INFORMATION

The Monitoring Agency for Space Flight Activities ("MASFA", "we", "us", or "our") operates as an information-only platform. We are committed to high standards of data privacy and transparency. This Privacy Policy outlines our data processing practices and clarifies the role of third-party infrastructure providers in the delivery of our services.

MASFA operates on a Privacy-by-Design principle. We do not directly solicit, collect, or store personal identifiable information (PII). We do not utilize user accounts, newsletter subscriptions, or marketing cookies.

2.

THIRD-PARTY DATA PROCESSORS

While MASFA does not maintain a proprietary database, our service relies on enterprise-grade third-party providers. These entities may process metadata for technical necessity:

- Infrastructure & Hosting: Our platform is hosted via Netlify, Inc. Netlify may automatically collect server logs (including IP addresses, browser types, and timestamps) to ensure site security, DDoS mitigation, and operational stability.
- Data Integration (APIs): To provide real-time aeronautical and meteorological data, we utilize:
 - TheSpaceDevs: Provides launch activity telemetry.
 - Open Meteo: Provides global weather data.

When your browser retrieves data from these providers, your IP address is visible to them as a technical requirement of the HTTP request. These providers typically utilize such data for rate-limiting and service optimization purposes only.

3.

COOKIES AND ANALYTICS

MASFA does not deploy first-party tracking, advertising, or profiling cookies. Any cookies present are strictly "Essential Cookies" utilized by our hosting provider (Netlify) to maintain secure sessions and site performance. We do not utilize Google Analytics or similar behavior-tracking suites.

4.

DATA SECURITY AND RETENTION

- Security: All traffic to MASFA is encrypted via Transport Layer Security (TLS/SSL).
- Retention: As we do not store PII, we maintain no data retention schedules for user information. For data retained by our sub-processors (e.g., Netlify server logs), retention typically follows their standard 90-day security cycle, subject to their respective privacy frameworks.

5.

INTERNATIONAL DATA TRANSFERS

Our hosting provider, Netlify, is headquartered in the United States. By using this website, you acknowledge that technical metadata may be processed on servers located outside of your country of residence. These transfers are governed by Standard Contractual Clauses (SCCs) and the security protocols of our infrastructure providers.

6.

DISCLOSURE OF USER RIGHTS

Under the GDPR (EU/UK) and CCPA/CPRA (USA), users possess rights regarding their data. Given that MASFA does not store user data, we cannot fulfill "Access" or "Deletion" requests as no such records exist. However, for inquiries regarding our data architecture, you may contact our website's hosting platform Netlify: <https://www.netlify.com/contact/>

7.

DATA SECURITY AND RETENTION

MASFA reserves the right to amend this policy to remain compliant with evolving international data protection laws. Users are encouraged to review this page periodically for updates.
